Miscellaneous Shower Held

Misses Marjorie Lee and Joan Bayley were joint hostesses at a surprise miscellaneous shower for Mae Todd at the home of her parents Mr. and Mrs. W. A. Todd on Wednesday night. Around 25 guests were present. The young hostesses had arranged a splendid program, with a treasure hunt for the gifts which were many and beautiful. The table decoration was in white and silver with a wedding cake (from the young girls of town) in the centre, and a miniature bride and groom. Besides the single girls several of the young married ladies were invited but the young hostesses were clever enough to rely on several of the more experienced cooks to provide and serve the "eats."

The Ladies Card Club met on Tuesday at the garage with Mrs. Cooley as hostess. Prizes went to Mrs. Lee and Mrs. Cooley. Mrs. Meeres will entertain next week at the garage.

Enquire at W. A. Todd for prices on fresh eggs.

Mrs. R. Stewart is spending a few days in town this week.

Miss Mae Todd visited at the home of Mrs. R. Stewart on Tuesday.

Miss Agnes Bunney is absent from school this week, having gone to her home to attend the wedding of her sister at Bearville.

Mr. W. Henderson, Calgary visited at the home of Mr. and Mrs. Isbister on Wednesday.

Mr. Mumford left for Winnipeg on Dec. 3rd where he will spend the winter months.

Mr. Thompson from the Collingwood district has moved to town where he will spend the winter months.

Mrs. McAndrew with her two children who have been visiting her mother, Mrs. Youngren returned to her home in Calgary on Saturday.

CURLING CLUB BRIDGE & DANCE HELD

The Chinook Curling Club sponsored a Bridge party, supper and dance Friday night, Nov. 29th in the Hotel. There was a good attendance, 12 tables of bridge being in play. Honors went to Messers Greid Gillette, 1st and Oscar Osterude, 2nd and to Misses Lorna Chapman, 1st and Kay Kain 2nd.

The dance was well patronized; Youells Orchestra supplying splendid music. Proceeds amounted to \$38.95

Fresh Sair Dates per lb. .9c

\$ \$ Sodas wood box .39c

Blue Ribbon Coffee
1 lb. glass jar .43c

The Trade Agreement

About all that can be said at this juncture in support of the Canada-United States trade agreement signed at Washington on Friday, Nov. 15, is that it is a step in the right direction and should be a prelude to further concessions in the interests of a freer flow of trade and commerce between two great neighboring and friendly countries.

Both the former Canadian administration and the newly-elected Dominion government are deserving of commendation and congratulation for their respective steps in the negotiations, which culminated in a pact to promote greater commercial intercourse between two States, geographically and ethnologically designed for close relationships.

Insofar, however, as judgment can be pronounced on the tangible benefits to be derived by the citizens of the Western Canadian prairie provinces as a result of the agreement, that is a verdict which must await results demonstrable after the pact has been in operation for awhile, and perhaps, for some considerable time.

This is a statement which cannot be emphasized too strongly. For it must be borne in mind that the benefits of a reciprocal commercial agreement cannot be reaped immediately the gates are flung open; nor can the maximum exchange of commodities, for which concessions have been granted, be realized in the earlier stages of the operations of an agreement.

There are good reasons for this. The amount of the duty reductions involved is by no means the only factor which determines the quantity and value of the goods exchanged between the co-operating signatories. There must be an available supply to meet a demand at the time the demand requires it. The demand must exist to take care of the supply. Trade practices and seasonal exigencies are contingencies which have to be reckoned with. New financial arrangements have to be made when commodities are diverted into new channels of trade. Existing stocks may have to be liquidated. New methods of packing and shipping may be involved.

Then, too, it should also be pointed out that a number of the commodities on which duties have been reduced under the agreement are subjected to quota restrictions and these will have some bearing in limiting the benefits to be derived.

These are only a few of the factors involved in the diversion of trade over new routes or in developing a trickle into a broad stream. There are others, and because of this, the Western Canadian producer must expect to wait awhile before he is able to reap enhanced prices for the products he exports to sell in a new market, and by the same token, the consumer must not hope to be able to purchase overnight goods imported under a newly signed agreement at a great deal less than the price he has been accustomed to pay.

Unquestionably one of the most important concessions to Western Canadian agriculture is the reduction of the duty on live cattle exported to the United States. This is one of the items, however, on which a quota restriction is placed. The lowering of the duty will provide a needed outlet for a considerable number of cattle but, on the other hand, many cattle raisers, who have been almost driven out of the business in the past two or three years on account of drought conditions, will not be in a position to take advantage of the new market for some time.

While Western Canadian consumers will undoubtedly benefit by reduction of tariff on a number of commodities importable from the U.S.A., it should not necessarily be assumed that the benefit will be immediate on all articles covered by the agreement or even, in some cases, to the full extent of the reduction in duty. For example, it has already been announced by the radio dealers' association in Winnipeg that the lowered duty on radios will not result in reduction of price to the Canadian purchaser because radios sold in this country are made in Canada "and are considerably cheaper than the American models plus duty."

These statements are not made with any intent to belittle the agreement, the efforts of the government who have a hand in the matter, or the ultimate results which may ensue as a result of the insertion of the thin end of the wedge, but they are made in the hope that over-optimism as to immediate results will not result in disappointment.

No matter what the operation of this first agreement may bring in the way of benefits to Western Canadian producers of exports and consumers of imports, the important thing is that it paves the way for further concessions and, it is to be hoped, in the not far distant future.

It might also well be pointed out that there are some indications that the operation of this pioneer pact may prove to be more beneficial than the more cautious commentators anticipate. The daily press reported that eastern Canadian manufacturers are apprehensive and, on the other side of the international boundary a number of interests, fearful of the effects of new Canadian imports, are planning to lodge vigorous protests at Washington. Straws show which way the wind is blowing.

This would indicate that the new agreement may be pitched into the political arena in the United States and may be a casus belli in the next national elections in that country, with what results remains to be seen. It is comforting to know that President Roosevelt has stated he believes the agreement will double the trade between the two countries within a couple of years and it may reasonably be expected that he will defend his action rather than recede from the position he has taken.

A Foot-Consistent Country

The United Kingdom is the most foot-consistent country in the Old World and buys more shoes per foot than any other country except the United States, according to organizers of the Shoe and Leather Fair at the Royal Agricultural Hall in London.

New Weather Predictor

Magnetometer Can Forecast Conditions Two Years Ahead

Selby Maxwell, instructor in meteorology, who has been doing research work in a laboratory at Northwestern University, Evanston, Ill., has invented a "magnetometer" to aid him in his computations.

"You can predict the world's weather for two years in advance with the same ease that you might predict a storm for to-morrow," he asserted.

Last August, he said, he knew there would be a major storm in the northeastern United States in mid-November. In October he made 12 charts of the storm's course, and placed a blue print of the storm in the hands of many weather men and his friends.

His new principle is based on the fact that the relative motions of the earth, moon and sun are irregular, resulting in a slight motion of the earth's whole mass.

"That causes the atmosphere, which is like a fluid, to slosh back and forth over the earth; just as water will slosh out of a pan if the pan is jiggled," he said.

Maxwell predicted little snow this winter and another drought next summer.

Fashions A Telescope

Western Ontario Student Makes Himself An Efficient Instrument

A few pieces of sheet metal, some bits of a broken windshield, and Randall Cole, of Clinton, University of Western Ontario student, can watch the rings gliding spinning about Saturn, or the moons on their never-ending trail around Jupiter.

For 18 months, he devoted his spare hours to working on odds and ends, and out of them, he fashioned, at no great expense, a telescope. Recently he showed his creation to his astronomical professor, Dr. H. R. Kingston, who described it as one of the most successful telescopes for amateur purposes he has seen.

Mr. Cole made the lens out of a piece of broken windshield, grinding it himself. For the six-inch mirror, he invested in a piece of one-inch plate glass, but even in that case, he made it into a mirror himself. Two pieces of sheet metal, rolled to resemble stove pipe, formed the base of the telescope. About it he constructed his lenses and mirrors, his delicate instruments, all of which were made out of wood, turned on his own lathe.

Royal Winter Fair

Alberta Is Heavy Winner In Cattle

Alberta came to fore at the Royal Winter Fair when Charles Bull, of Calgary, exhibited the winner in the senior yearling division for bulls. Hereford beef cattle section. Exhibitors of Kendall Stock Co., Kew, Alta., and Frank Collicutt, Crossfield, Alta., were second and third, respectively.

Western entries also dominated the bull junior yearling class with first ribbon going to W. Crawford, Frost, Hanton, Alta., on Donald Stanway Third. In second place was Hughes Bros., High River, Alta., with Watercroft Bardolph.

The Prince of Wales ranch of High River, Alta., with Eapton Orator, was judged best in the bull, two years and under three class of the Shorthorn beef cattle section.

No Vaccination Marks

Just Swallow A Pill Is The New Method

The day when little Mary will vaccinate herself by gulping down a pill was envisioned by Dr. Lloyd Arnold of the University of Illinois.

The vaccination mark will thus be done away with, the medical college professor told bacteriologists of Indiana, Michigan and Ohio. The pill, he said, will contain vaccine, or dead bacteria.

In order that this stuff may not be destroyed by digestive fluids, science plays a trick on the stomach, administering a bile pill thirty minutes before the vaccination pill is taken, he said.

As a result, the stomach remains quiet for one or two hours, and the vaccine passes on unchanged to a small intestine, where it is slowly absorbed into the blood stream.

Sounds Like Good Advice

A farmer once asked the editor of a country paper for advice, as follows: "I have a horse that at times appears normal but at other times is lame to an alarming degree. What shall I do?"

The reply came: "The next time your horse appears normal, sell him."

A New Ship Elevator

Will Be Capable Of Handling Vessels Of 11,000 Tons

A ship elevator is being constructed near Rothensee, Germany, about eight and a half miles north of Magdeburg, where the Mittelland canal crosses the River Elbe by a large aqueduct.

The difference between the level of the water of the canal and of the river varies from about 31 feet at high tide to nearly 66 feet at low.

This new elevator will resemble the famous ship elevator at Niederfinow in so far that it will be able to accommodate ships of 11,000 tons, but otherwise represents a different type of construction.

While the Niederfinow elevator rises 210 feet above the earth's surface, the new construction near Rothensee will build deep in the ground. Instead of the water trough which carries the ships being hoisted up and down on wire-pulleys, here it will rest on two floats, each 30 to 96 feet, which are propelled by hydraulic pressure, and move up and down in shafts 210 feet deep.

The shafts, which have now been completed, stand over 150 feet apart and are each 33 feet thick with cast-iron interior walls, reinforced with concrete. Pillars 60 feet high carry the water-through, and, like the Niederfinow elevator, the whole structure rests on an enormous concrete caisson.

Canadian Book Contest

\$2,000 To Be Awarded In Prizes For The Two Best Books

Announcement is made of a contest open to any Canadian citizen who is a resident of Canada (as of Sept. 16, 1935) and who feels they have the ability to write a fiction or non-fiction book in the English language of not less than 60,000 or more than 125,000 words. The contest closes June 1st, 1936, and the winning books will be published within six months after the prize is awarded.

Entrant judges have been chosen for the contest as follows: Dr. Pelham Edgar, National President, The Canadian Authors' Association; Mr. S. Morgan-Powell, Assistant Editor-in-Chief, The Montreal Daily Star; Mr. C. R. Sanderson, Deputy Chief Librarian, Toronto Public Library.

Application blanks for the contest and further details may be obtained from George J. McLeod, Limited, 265-268 King St. West, Toronto, Ontario. Secretary, The Canadian Authors' Association, P.O. Box 1424, Montreal, Quebec.

We hope that some of our readers will enter this contest, and wish them all success in their efforts.

Introduced By Canada

Women In Scotland Take To Wearing Of Raincoats

Canadians are generally accustomed to the wearing of rubbers as a protection in wet weather. In the British Isles rubber coverings for the feet are not so common, the general practice being to wear heavier soled boots and shoes. This is particularly the case in Scotland.

The women of Scotland are taking to the wearing of raincoats, or gaiters, introduced by Canada to the market last year in place of the old Wellingtons, which are now being relegated to the country and for use by children. Canada supplies the major proportion of the rubber footwear imported into Scotland, with Hong Kong occupying second place, according to the industrial department of the Canadian National Railways. A part of the trade is supplied by domestic manufacturers.

In Primitive State

Says Indians Of James Bay Area Have Changed Little In Past Centuries

Despite three centuries of missionary and other contacts with the white race, one group of Canadian Indians to-day was reported much the same as it was 1,000 years ago.

Dr. Triniton Michelson, Smithsonian Institute ethnologist, found last summer that the James Bay Indians in northeastern part of Ontario have changed their language, customs, folklore and mythology little during the past eight or 10 centuries.

He said they probably are nearer than any other Indians to the type of primitive Algonquins who peopled eastern North America long before the white man arrived.

Famed River Drying Up

Many Ships Stranded On Sand Banks In Blue Danube

The famous Danube river is drying up—as a result of drought unprecedented for this time of year.

The Danube and Sava, which meet under the walls of Belgrade, are now lower than for more than 50 years. In many places people can wade across them.

All navigation on the Sava has been abandoned and many ships are stranded on sand banks. On the Danube only small vessels of less than four feet draught can pass.

River service between Belgrade and Vienna has stopped.

Willing To Help

Charles Phillips in his "Pade-revski" tells a story of Lord Balfour. In 1917, Balfour was in Washington, and one evening at dinner he handed back the menu card to the Negro waiter and, placing a generous tip by his plate, said, "Just bring me a good meal."

A very good meal was served, and the same thing happened several times.

On the last occasion the tip was trifled. "Thank you, sah," said the Negro, "an' if you done got any other friend's 'vat can't read,' you jes' send 'em to me, sah."

A flannel cloth dipped in oatmeal makes a good cleaner for painted woodwork.

Rubber latex is successfully used for cement purposes.

Curious Old Laws

Smoking On Street Is Still Illegal In Britain

A recent freak court case at Hastings caused lawyers to search the statute books and remind Britons that curious laws remain un repealed and could send anyone to jail.

Still illegal in Britain are: Smoking a cigarette in the street. Sunday radio broadcasting.

Christmas dinner of more than three courses.

Making a mince pie "an abominable and idolatrous thing."

Playing billiards on a Sunday.

It is possible, according to the old laws, for anyone to be jailed for inducing another person to drink more liquor than would be good for him.

Held Meeting In Air

Believed to be the first business meeting ever held in the air the Blackpool Airport committee while returning from the Isle of Man heard minutes read and concluded transaction of business just as their plane landed.

In a girl a nose turning up sharply is reticence; in a man it's plain pug.

2 Things to Do TO EASE COLD INSTANTLY

Discomfort and Ache Go Almost Instantly This Way

1. Take two "Aspirin" Tablets. Make sure you get "Aspirin".

2. Drink a full glass of water. Repeat treatment in 2 hours.

Instead of leaving your system with strong medicines for a cold, try the way pictured above—the modern, easy way. Your own doctor will approve it. And it takes hold of even a bad cold almost immediately. The "Aspirin" you take will start combating your cold internally at once; if throat is sore, crush and stir 3 "Aspirin" Tablets in a third

of a glass of water; gargle twice. Do not rinse mouth. "Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

DEMAND AND GET "ASPIRIN"

FLEMING'S FOLLY

—BY—
LAWRENCE A. KEATING

CHAPTER I

Chill with promise of approaching winter, a low moaning, sighing wind curled down from the snow peaked Captain Mountains twenty miles west to devil-dance with macabre glee in the wide main street of the cowtown of Rawhide.

Buckboard teams and saddle horses lined the jumper hitchrails before Sam Pickett's General Store, the false-fronted Half Moon Saloon, and the three-story Trailend Hotel across the street. With ears flapped and muzzles lowered between their lines, roans, mustangs, and bronks huddled together in morose resignation to the sting and nip of dust-swirls that now and then all but hid them from view.

Through broad, hazy windows of the hotel lobby could be seen the meeting of Boone County cattlemen, called by the owner of the modest Star Loop Ranch, Link Fleming. Every prairie-tanned countenance was etched in lines of gravity, every ear attuned to the earnest words of the twenty-three year old speaker in cowhide vest and work trousers who, with sombrero tilted on his high forehead, faced the crowd from the elevation of a round-backed heavy chair.

Pausing, Link let his brown eyes, set wide apart and flecked with grey, sweep slowly, hopefully over the assembled men who waited in abtorted interest. He lowered a shrewd brown hand to his straight belt and shifted the heavy forty-five to a new position on his thigh. Clearing his throat, he held up a paper and continued:

"Reckon every one of you got a message like mine. It says here Uncle Sam don't want us to graze the foothills ranges any more. The reason is, grass up there has got thin and worn out, and never had the chance for a comeback. We've wiped those ranges almost clean, until every cow needs twelve or fifteen acres. When you started runnin' beef in this section, Seth Howland, what acreage did a steer use up?"

At the sudden focus of attention on him, Howland, a lank, watery-eyed veteran of Texas trails, blinked startledly. He rolled the inevitable quid from one hollow cheek to the other and back again. Seth swallowed and shifted weight.

"Feed was plentiful," he answered

finally. "Reckon you could say half the acreage'd go as much then as now. Maybe less."

"And nobody tried to tell you whether you could graze here or there or some other place. Did they?"

A dozen pairs of eyes moved from Seth to the somewhat flushed face of Buzz Hamilton, young manager of his own and his absent sister Helen's Triple H spread. Buzz removed the drooping brownpaper cigarette from his mouth. It came plain from his scornful tone and attitude that before coming here he had passed at the Half Moon Saloon for liquid refreshment which always had the effect of making him surly.

"Nobody ever could tell a Texan man nothin'," Howland agreed with a shrug. "The range was free in them days, like it oughta be free now."

Growsls and nods proved the body of ranchers in hearty accord. "Ain't no city gent gonna tell me where to feed my cows!" threatened redheaded Burr Kilgus.

"What's the gov'ment got to say about this, anyhow?" another man demanded.

"Anybody tried to stop up from summerin' in them foothills, he's plumb liable to get his neck stretched on the handiest blue pine!" loudly declared Gyp Vaille.

"Boys," Link put in, "I don't like this interference any better than you do. But it won't solve our problem to hang anyone, or put up a gunfight. Down at Ox Draw they held a necktie party with a government man for the honored guest. The result was a regular small-time war, with seven killed, cattle run off, and a dozen ranchers and waddies jailed. The government won. Go. Draw cattle stayed out of the foothills last summer, didn't they?"

"That's right." As everyone looked at Otto Pieper, the scrawny necked president of the Stockmen's Bank, paled. He passed a bony hand over his shining bald head as if in search of the hair that once had warmed it, and caused a nervous preparation for further speech.

"It'd be suicide," he quavered. "Killed ten agents and 50 soldiers' come. Hang the lot of 'em and five hundred'll be here next day. No, sir!"

Otto declared with emphasis. "This government order means what it says. Fleming is dead right about that. I stand for everything fair on the range, but I'm for the American flag, too! That there, uh, striped series of patriotism borne so fearlessly by a host of honest-meanin' pioneers like ourselves. Gents, would yuh snap at the hand that's feedin' yuh? Then cut out this talk of hangin' and killin'." Pieper advised earnestly.

"Abandon it, I say, and—" "Elect you to Congress!" There was a laugh at Pieper's expense. As it rippled and died Hamilton elbowed his way to the front of the crowd until he stood near burly, heavy-jawed Roper Kilgo. Buzz's hot words were calculated to inflame others to his own fiery impulsiveness.

"That's all right to talk big, but what will it get yuh? For years them foothills have been free. Now some politician decides we got to be kicked off. Is that justice? Why, there wouldn't be a settlement in the whole west if it wasn't for cattlemen!"

"I say," he went on, warmed to alcoholic bitterness, "if government agents come here to enforce this, lynch 'em. Show 'em who's boss. Are we goin' to let them eastern gys starve our herds and ruin us? If we're goin' to lose everything anyhow, we might as well fight!" His words brought grim approval from several men in a series of low muttered growls that ran around the hotel lobby. Watching closely, Link saw his own foreman, forthright Buster Townsend, apparently swayed by this suggestion of rough and ready resistance. So also was Honest John Mulrooney, a heavily built Irishman, Fleming's neighbor. Marty Bush, the local cattle agent, remained calm, as did a few others. Fearful lest this

meeting get out of hand so that he could not offer the plan for which he had summoned them here, Link sought some means of placating the men.

"A year ago we talked of ways of improving our range, making more money out of steers. I suggested a remedy which is even more important to us now. What we need is permanent relief."

"Irrigation, I suppose," sneered Hamilton. "You been cracked on it ever since yuh came here." He swayed slightly as he faced the crowd. "What's the use talkin' about a scheme that's never been tried? I say we got to fight for our rights, or nobody'll even feel sorry for us!"

"Who says it's never been tried?" Roper Kilgo spoke up good naturedly. "I'm for findin' out, in case irrigation'd be a good thing. Especially 'cause like Pieper told us, boys, we can't fight the whole U.S. Army."

Let's hear what Link's got to say," he went on in a persuasive tone. "I never thought much about waterin' dead land, but Fleming's talkin' a long time, and I reckon he's gone into it plumb thorough. Tells me he got Soak Torney to draw up plans for a scheme to irrigate the whole valley. I'm with you gents on whatever he's decided, but this grazin' order means business, so we ought to look into the water question."

Link felt a thrill of relief as the words brought instant peace. He had begun to fear from Roper's silence that he was failing him. No particular friends, this was one of the rare occasions on which they found themselves working in harmony. Fleming had ridden to the Box 50 yesterday to win this powerful support to his irrigation scheme—at which Kilgo, like most other ranchers, had always scoffed. But the grazing order seemed to make him willing to reconsider, for he owned the largest herd of beef cattle in Boone County.

"Tell yuh, Link," Roper had declared before the visitor outlined his purpose. "I'll do what I can to have the boys think it over. Can't promise they'll back it, but I guess we're all willin' to be shown."

This was indeed a concession, and it roused hope in the Star Loop owner. "That's all I ask," he grinned eagerly. "If yuh'll help get the men in a receptive frame of mind I'll explain to them. If they reject it we haven't lost anything. And if they go in for it this country will be a changed place!"

Kilgo had studied his visitor shrewdly. "Then yuh don't think irrigation is just a crazy, newfangled idea?"

"Not at all. It'll not only save us from ruin, but it will make every spread more prosperous than ever before. Your place can benefit plenty."

"Well, I'm always open-minded to a good thing. I'll get yuh a hearin', Link. Reckon if Roper Kilgo says 'Boys, listen to this,' they'll listen. Eh?"

It was true enough. He was the most influential citizen of Boone County—and, Link had come to suspect, the real power behind local affairs. He was virtually county boss, a czar, jealous of his prestige and ruling with an iron fist. The man who dared interfere with or oppose Roper was doomed to defeat. There were whispered stories almost become legend, of certain persons he had marked with his wrath, and the series of misfortunes which came their way after that. More than one small-rancher finally had sold out for a pitiful sum, his acres and steers becoming part of the Box 50 while the man himself hurriedly sought Boone County dust from his boots and never was heard of again.

Roper's influence defied analysis: it appeared to be a strange combination of brute force and personal magnetism. A number of ranchers constantly owed him sums of money, although the Stockmen's Bank existed to care for just such financial matters. Other men were indebted to him for various services, real or imagined. Still others gave blind allegiance as in all ages and in all climes the weak obey the strong. The Box 50 owner

was strong, he was forceful. With a round, black-thatched head set on bull-like shoulders, he was as powerful physically as he was relentless when crossed, and determined on every project he undertook.

(To Be Continued)

Still Holds Public Interest

News About Little Prince Of Kent Is Eagerly Read

The recently born Prince of Kent, who may some day sit upon the mighty throne of England, is compelling these days most successfully with war news and what the Prince of Wales were.

The most minute details of how the baby son of the Duke and Duchess of Kent is progressing are devoured by the British public.

In drawing room, banquet hall and "pub" there is a new toast in vogue—"To the new prince."

He is the fifth grandchild and the third grandson of the King and Queen, and will have the title of royal highness. Since 1917, this title has been confined to the issue of any British sovereign and to the issue of the sons of the sovereign.

The little Prince is related to half of Europe. In his veins flows royal German blood from his grandmother, who was a Princess of Teck, and the King, grandson of Alberta the Good of Sax-Coburg-Gotha. The royal baby is also related to Russian, Danish and Roumanian royalty.

A new coat of arms must be chosen for the highborn baby. The College of Arms will design it, and it must be approved by the King.

Ex-Prisoner Makes Good

Studies Advertising And Builds Up An Envyable Business

Years spent behind the grim walls of Ohio penitentiary showed Daniel Boggs, now only 31 years of age, the way to earn a honest fortune.

Since he was released from the penal institution less than a year ago through executive clemency, Boggs has built up an enviable advertising business and now has three offices.

During his sentence in the penitentiary Boggs studied advertising and became an advertising writer to earn money to provide financial aid to his aged mother and four sisters. They depended on him before he was "taken away."

He won the admiration of advertising men in Columbus, O., by his aptitude for copy-writing ability and became an advertising writer to write mail order business.

Upon his release he was offered a job in Cincinnati at \$75 a week. He declined the offer and remained here to establish his own concern.

Boggs is blazing a glorious trail along the "come-back" path and as a doctor to ailing business firms he has proven quite successful.

Britain's Defence Plans

Country Obligated To Bring Forces Up For Safety

Britain proposes to spend one billion dollars at once in building up the navy and the air force until these are the strongest in the world. Britain is to take no chances. She is not going to trust plumes hopes any longer. If trouble comes, she is going to be prepared for it. Might has again taken the place of right as a solution for international troubles, and if preparedness for war can stop war, Britain is going to be ready to do the stopping.

This is a tragic situation to develop so soon after the great world war. Britain, however, is blameless for it. She disarmed, while others were arming. She cut down her defence forces to a dangerous low level, as an example to other nations, an example which they refused to follow. Under these circumstances, it is not to be wondered at that realism has taken the place of idealism in Britain's defence plans.—Oshawa Times.

Strange Body Structure

The Way To His Heart Is Through His Stomach

A boy whose heart is in the region of his stomach has been found in Soviet Russia. He is K. Otar, aged 10, and the strange structure of his body was revealed when he underwent a medical examination at Kutais. Apart from his peculiarity, the boy is normally developed and is a good scholar.

Has Reason To Object

Colin Mills' mother objected strenuously to his collection of 23 live snakes. She said she abhorred every time she stepped over their althier bodies going to get a jar of fruit in the cellar. Colin has boarded some of his snakes at a pet shop and keeps the rest in the cellar of his father's store at Hamilton, Ont. 2127

Famous Paintings For Rent

University Trying To Foster Deeper Appreciation For Art

Hall bedrooms that never saw any better art than movie stars' pictures will soon be blossoming out with colored reproductions of famous paintings, if Prof. Lester Longman's plans go through. The professor is head of the fine arts department of McMaster University, and has hit on the idea of renting out the college-owned pictures at 10 cents for two weeks.

"The 10 cents fee is really a guarantee of interest," the professor told The Herald. "It will mean that the students won't just drag the pictures home, put them aside and pay no more attention to them. I feel that the dime will be a sort of premium, and I think that a deeper appreciation of art will be fostered this way."

At present the pictures are on exhibition at the university. There are 75 now framed and ready to be rented. The collection contains pictures of the 17th and 18th century masters, as well as some modern cubist and impressionists. Among the older pictures are Gainsborough's "Portrait of Graham," Lawrence's "Master Lampton," and Gilbert Stuart's "Portrait of Washington."

There are no Canadian reproductions, because the work of Canadian artists are not reproduced in such proportions. There are English, French, Italian and one or two Spanish portraits.

The idea of renting pictures originated two years ago with a friend of Prof. Longman at Brown University in the United States.

According To Schoolboys

Examination In Science Produced Some Remarkable Answers

From schoolboys' science papers: The earth makes a resolution every 24 hours.

The difference between air and water is that air can be made wetter and water cannot.

We are now the masters of steam and eccentricity.

Things that are equal to each other are equal to anything else. Gravity is chiefly noticeable in the autumn, when the apples are falling from the trees.

The axis of the earth is an imaginary line on which the earth takes its daily routine.

A parallel straight line is one which if produced to meet itself does not meet.

Electricity and lightning are of the same nature, the only difference being that lightning is often several miles long, while electricity is only a few inches.

He (after being turned down): "I'm not worrying; there's a lot more fish in the sea."

She: "Yes, and if nobody's got a better line than you have they'll all stay there."

Mother's Guide to Better

CONTROL of COLDS

For Fewer Colds . . .
Vicks Vapo-Rub helps Prevent many Colds

At the first warning sneeze or nasal irritation, quick!—a few drops of Vicks Vapo-Rub on each nostril. Especially designed for nose and throat, where most colds start, Vapo-Rub helps to prevent many colds—and to throw off head colds in their early stages.

Follow Vicks Plan for Better Control of Colds
A helpful guide to fewer colds and shorter colds. Developed by Vicks Chemists and Medical Staff; tested in extensive clinics by practicing physicians—further proved in everyday home use by millions. The Plan is fully explained in each Vicks package.

For Shorter Colds . . .
Vicks Vapo-Rub helps End a Cold sooner

If a cold has already developed, use Vicks Vapo-Rub, the mother's standby in treating colds. Rubbed on at bedtime, its combined poultice-vapor action loosens phlegm, soothes irritation, helps break congestion. Often, by morning the worst of the cold is over.

M. L. CHAPMAN, Chinook

The Chinook Womens Institute are holding a Bazaar and silver tea in the showroom of Cooley's garage on Saturday afternoon, December 7th.

W. I. Annual Meeting Held

The annual meeting of the Chinook W. I. was held at Mrs. Milligan's home on Wednesday December 4th. Final plans for the Bazaar and tea to be held on Saturday, Dec 7 were made.

Reports from the Sec-Tres, and reports from the standing committees were made and accepted.

Fees for the coming year were set at 25 cents. A motion was passed that all officers continue in office for next year. Christmas cheer giving was decided on and a \$5.00 donation made toward the school Xmas tree expenses.

The first lesson in Home nursing will be started next month. After the business period a dainty lunch was served by Mesdames Wilson and Milligan.

A. M. Rideout, Sec

School Fair Meeting

A meeting of the Chinook and district School Fair was held on Saturday, November 30, at 2:00 p. m. Eight were present at the meeting.

The minutes were read and approved.

Mrs. Shier—Mrs. R. Stewart—that the reception committee be chosen from the officials and directors.

Mrs. Shier—Mrs. R. Stewart—that the dance committee be asked to give a report of the net proceeds from the School Fair dance put on on Sat. Sept. 21. They reported \$16.35, which is to be placed in the funds for the 1936 School Fair.

Mrs. Shier—J. Haggerty—that the committee's report be accepted with thanks.

L. Dressel—Mrs. R. Stewart—that the winners of the scholarship Short Course to Olds and the schools winning the Diplomas be announced at the school concert. These are as follows:

Margaret Davis 117 points
Mervin Laughlin 42 points
Diploma from Dep't of Agric.—Swan 40.15 points per pupil.

Diploma from Dep't of Education—Chinook Room 11 17.01 points per pupil.

Mr. Todd—Mrs. Shier—that all exhibitors of vegetables must receive \$1.00 Fair seeds and must exhibit product from these seeds.

Mrs. Shier—Mrs. R. Stewart—that Class 70, a kimono apron be changed to a kimono nightgown and that this recommendation be sent into the Department.

Mr. Todd—Mrs. Shier—that we have a policeman present on the day of the fair.

J. Haggerty—L. Dressel—that the directors be a committee to have it announced at school that this precaution was deemed necessary due to the pilfering of exhibits at past fairs.

Mrs. Shier—Mrs. R. Stewart—that the directors be on duty during the judging.

Mr. Todd—Mrs. R. Stewart—that we accept the financial report and that the Secretary prepare a synopsis which might be published in the paper as news.

CANADIAN NATIONAL

W.1404.35

Todd—Dressel—that a vote of thanks be given to the people of the Myrtle and Peyton districts who so liberally donated to the School Fair.

J. Haggerty—Miss Jensen—that a vote of thanks be given to the teachers, parents and the public in general who contributed in any way to the School Fair.

Todd—Dressel—that the organization meeting of the Chinook and District School Fair for 1936, be held on Saturday, February 1st.

Mrs. Shier—J. Haggerty—that the meeting adjourn.

Wedding Bells

MURPHY—DEMANN

The Graum Roman Catholic church was the scene of a pretty wedding when Evelyn Demann, youngest daughter of Mr. and Mrs. Peter Demann, was united in marriage to Mr. Lee Murphy, November 26th, at 10 o'clock by the Rev. Father Hughes, assisted by Rev. Father MacGillivray of Macleod.

The attendants were Miss Juna Ryan of Macleod as bridesmaid, Mrs. William Diett sister of the bride, of Medicine Hat, as matron of honor, and Leonard Demann, brother of the bride, as groomsmen. The bride's wedding ensemble consisted of a gown of white crepe with bridal veil of white silk net bound by a coronet of orange blossoms. She bouquet of pink roses and white chrysanthemums. The bridesmaid was attired in a smart gown of pale green silk lace with accessories to match. She carried a large bouquet of pale yellow mums. Mrs. Diett, matron of honor, was gowned in a floor length dress of yellow organdie and accessories, also carrying a large bouquet of yellow chrysanthemums. During the ceremony Mrs. J. Boyle presided at the organ and rendered the wedding march from Lohengrin.

During the signing of the register Mrs. Lloyd Sherman sang. At the close of the ceremony, which included high mass, the guests retired to the home of the brides parents where a wedding dinner was served. After a short honeymoon Mr. and Mrs. Murphy will take up residence here. Mr. Murphy is the eldest son of Mr. and Mrs. Matthew Murphy of Vancouver, formerly residents of this district.

COLLHOLME "NEWSLETS"

Having survived effects and criticism of a part of our general public, the newsletters are again appearing this week; all caution thrown to the wind; in order to verify our previous statement that these items would appear again this week.

Last Thursday evening a number of friends including the Broston family, Miss Ethel Young, Lester Anderson, and W. Morrison gathered at the Hutchison home in honor of Mr. Hutchison; the occasion being his 50th birthday.

Mr. N. D. Stewart returned from Calgary Tuesday morning having attended the Poo Delegates Convention. Mr. N. Stewart's business will take him to Edmonton next week. In his absence from the farm Elmer Spreeman has been carrying on the necessary duties.

Mr. Fred Hobson shipped one carload of farm machinery last week to his new location at Tees, Alta. in the Clive district. The family, stock, etc. will follow late in the spring.

Messrs Carl Lee and M. Broston are seen quite frequently in 'Chinook and Cereal. Do you suppose that the boys are trying the studio of our good friend Frogan; in their recent activities.

Mrs. A. Anderson returned Saturday from Calgary where she has spent the past three weeks.

Effective Dec. 1st, local passenger train time changed bringing no. 9 from the East into Chinook at 1:41 A. M. No. 10 from Calgary leaves at 1:40 and twenty minutes later than at present. It now leaves Calgary at 7:30 p. m. and arrives in Chinook at 3:01 A. M.

Duty To Lower Orange Prices

A drop in the retail price of oranges of about five cents a dozen is expected in the first four months of 1939, fruit dealers stated this morning.

The reduction is expected to follow lifting of the duty on oranges from California for that period, amounting to about 70 cents per case, as measured on a cubic foot basis, for duty purposes. An excise tax of three per cent will be levied only for that period, and the duty reinstated after April. Wholesalers expected the reduction would amounting to somewhere in the neighborhood of a nickel a dozen.

The turkey raisers of Chinook had a big day on Saturday "talking turkey" three thousand pounds of dressed turkey being shipped to Calgary and Hanna.

Mr. D. G. Ware, field Secretary of the Social Hygiene Association of Alberta was in Chinook on Thursday, and lectured at the school.

Mr. J. L. Eglesham, relief representative returned from Stettler and other points, Sunday.

Here and There

Our vanishing wilderness have for some time elicited the concern of conservationists, but no adequate speaking of the solitude in behalf of some of the glaciers which bid fair to disappear within a few decades, if according to estimates succeeded by mild winters become the rule. Dr. Francois E. Mathias, of the United States Geological Survey, fears that within another 30 years Glacier National Park, Montana, may be minus its glaciers. Mount Rainier National Park, Washington, also has suffered from heat prostration. At no time within the memory of living persons has the recession of the ice rivers in these areas been so rapid as during the long-protracted heat wave of 1934. During normal winters snowfall and frost are wont to replace to a large degree the melting snows of summer.

Third annual competition for the most beautiful autumn-tinted maple leaf is announced by the Canadian Government through the Canadian Travel Bureau at Ottawa in co-operation with the Canadian Pacific and Canadian National Railways. The prize for the 1935 competition provides for a total of \$200, of which \$100 goes to the person sending in the most beautiful leaf; a second prize of \$40 and a third prize of \$20. In addition a prize of \$20 for the leaf with largest area, and second largest leaf will be awarded.

"Steel of Empire," the recently published work by John Murray Gibson, while really the story of the Canadian Pacific Railway, has so much of other Canadian history that it will find a permanent place in the annals of the Dominion. Starting with the first known arrival on our shores, a Chinaman, Hui Sien, in British Columbia at the end of the fifteenth century, Mr. Gibson traces the romantic growth of the Canadian Pacific, many centuries later, with a wealth of incident and detail, the author's long association with the railway having been of the utmost value.

Possessing one of the finest collections in the world of colored pictures of scenes in the heart of the Rocky Mountains, T. H. Lonsdale, of Banff, recently exhibited them to the Women's Canadian Club at an illustrated lecture at the Vancouver Hotel. The pictures included scenes of mountains, valleys, lakes and birds, animal and flower life.

Evangeline Booth, 69-year-old commandant-in-chief of the Salvation Army, told the "story of the Army" to the Men and Women's Canadian Club at the Royal York Hotel, Toronto, recently. "I was born in a little village in England, but it has never become a common thing to me. It has always been a miracle. The city audience gave her an ovation."

Keen outdoor man, enthusiastic member and past president of the Trail Riders of the Canadian Rockies and a leading stalwart in the ranks of the Trail Hikers, J. M. Wardle, chief engineer, National Parks of Canada, has been well-deserved promotion to the post of deputy minister of the Department of the Interior, Ottawa.

Premier Dwyer, of New Brunswick, was the chief speaker recently when the City of Saint John played host at a dinner in the Admiral Vesty Hotel to New Brunswick's guides at their twenty-fifth annual convention. Heavy fall gazing effected attendance, but a good membership under the chairmanship of William T. Griffin, of Pointe-aux-Lacs, president of the association, enjoyed a successful gathering.

Curling will officially start the 1935-36 season (tonight) Thursday, when the first games for the Turkey supper are played off between the President and Vice President. Turkey owners are reminded to keep their turkeys locked up these nights.

Canada To Have Streamline Locomotives

Marking the peak of engine development in the fifty years since the driving of the last spike at Craigellachie, the Canadian Pacific Railway has under construction five light-weight locomotives, which are being built to attain a speed of 110 miles per hour. Streamlining and an increased ratio of power to weight and fuel consumption are their outstanding characteristics. Many of the ideas incorporated in these engines are quite new, having been originated by Canadian Pacific engineers under the supervision of H. B. Bowen, Chief of Motive Power and Rolling Stock. In addition, the Company's engineers closely watched experi-

ments made by leading railways of other countries, and have adapted and developed the best features brought out. The new Canadian Pacific engines mark a long step forward in locomotive construction. The first five engines will be used to improve the Company's passenger service between Montreal and Quebec, and will haul at high speeds trains of new light-weight coaches now being built for the service. They are of 4-4-4 type, with a total engine and tender weight of 430,000 lbs., or about 33 per cent lighter than engines now running, and designed to do the same relative work. This means a consequent

important saving in fuel, water and maintenance. The boilers are of nickel steel designed to stand a pressure of 300 lbs. per square inch, and fittings and appliances are all of the latest type, including super-heaters, feed water heaters, mechanical stokers, roller bearings and tandem connecting rods. They are coal burning, the tenders having a capacity of twelve tons. The tractive effort will be 25,000 lbs., cylinders 18½ by 28 inches, with 10 drivers having a diameter of 80 inches. Photographs of a model give a comprehensive view of the new engine. Trained in H. B. Bowen, Chief of Motive Power, Canadian Pacific Railway.
